Guarantee

WE do not appoint agents for the sale of our motor cycles or other goods. We assign to Motor Cycle Dealers, who carry on business on their own account, areas, in which they have the exclusive or other right to sell goods purchased by them from us. A Dealer purchasing from us, or a Sub-Dealer purchasing from him, may assign to his purchaser the benefit of the guarantee printed below. Any such dealer is not authorised to advertise, incur any debts, or transact any business whatsoever on our account; nor is he authorised, so as to bind us, to give any warranty, or make any representation or make or agree to any condition on our behalf.

We give the following guarantee with our motor cycles, which is given in place of any conditions, warranties or liabilities whatsoever, implied by law, implied at the place of manufacture and/or at the place of sale, all such implied conditions, warranties and liabilities being in all cases excluded. Any statement, description, condition or representation contained in our Catalogue, or in any advertisement, leaflet or other publication shall not be construed as enlarging, varying or overriding this guarantee. In the case of machines which have been used for "hiring out" purposes, or any motor cycle used for any dirt track, cinder track or grass track racing or competitions (or any competition of any kind within an enclosure for which a charge is made for admission to take part in or view the competition), or from which our trade mark or manufacturing number has been removed, no warranty or condition of any kind is given or is to be implied.

We guarantee, subject to the conditions mentioned below, that all precautions which are usual and reasonable have been taken by us to secure excellence of materials and workmanship, but this guarantee is to extend and be in force for six months only from date of delivery, and damages for which we make ourselves responsible under this guarantee are limited to the free supply of a new part in exchange for the part of the motor cycle which may have proved defective. We do not undertake to replace or refix, or bear the cost of replacing or refixing, such new part in the motor cycle. We undertake, subject to the conditions mentioned below, to make good at any time within six months any defects in these respects. As motor cycles are easily liable to derangement by neglect or misuse this guarantee does not apply to defects caused by wear and tear, misuse or neglect.

The term "misuse" shall include amongst others the following acts:—

1. The attaching of a sidecar to the motor cycle.
2. The use of a motor cycle when carrying more persons or a greater weight than that for which the machine was designed by the manufacturers.

Any motor cycle sent to us to be plated, enamelled or repaired will be repaired upon the following conditions, i.e., we guarantee that all precautions which are usual and reasonable have been taken by us to secure excellence of materials and workmanship, such guarantee to extend and be in force for three months only from the time such work shall have been executed or until the expiration of the six months above referred to, and this guarantee is in lieu and in exclusion of any common law or statute warranty or condition, and the damages recoverable are limited to the cost of any further work which may be necessary to amend and make good the work found to be defective.

CONDITIONS OF GUARANTEE.

If a defective part should be found in our motor cycles, or in any part supplied by way of exchange before referred to, it must be sent to us **Carriage Paid**, and accompanied by an intimation from the sender that he desires to have it repaired or exchanged free of charge under our guarantee, and he must also furnish us at the same time with the number of the machine, the name of the Dealer from whom he purchased, and the date of the purchase, or the date when the alleged defective part was exchanged as the case may be.

Failing compliance with the above, no notice will be taken of anything which may arrive, but such articles will lie here **at the risk of the senders.**

We guarantee only those machines which are bought either from us or from a Dealer, who has purchased direct from us, or from a Sub-Dealer who has purchased from him, and under no other conditions.

We do not guarantee the specialities of other firms such as tyres, saddles, chains, lamps, etc., nor do we guarantee any component parts supplied to the order of the purchaser differing from our standard specifications supplied with our motor cycles, or otherwise.

TRIUMPH SERVICE.

TRIUMPH Distributors who carry a stock of spare parts are situated in practically every country throughout the world. These Distributors have their own Dealers, who are in a position to meet promptly the demands of any owner within their territory.

Triumph Dealers are always ready to render willing and dependable service wherever you may be located.

We do not supply transfers as originally affixed to Triumph machines, but we will supply a transfer denoting that the machine is of Triumph manufacture, provided the frame and engine numbers are quoted.

We wish to warn owners to avoid purchasing parts that are not of genuine Triumph manufacture. This can best be done by purchasing parts direct from our Head Spares Department, Coventry, the London Spares Depot, our recognised Service Stockists, or any of our appointed dealers.

WHEN ORDERING SPARES.

To meet the requirements of Overseas Markets the engine fitted to the Model XO has been manufactured in two sizes, viz—147 c.c. and 174 c.c. When ordering engine parts it is therefore essential that you should quote the *number* of the engine for which the parts are required.

It will be observed that each part illustrated is numbered separately. Some small parts, such as nuts, washers, screws, bolts, etc., are identical, and when such is the case the same number is used throughout. To trace any part required please refer to the part in the illustration and note the number quoted underneath and a corresponding number will be found alongside the part described in the text. As all parts belonging to a particular unit are grouped, as given in the Index, another method is to refer to that section dealing with the unit concerned.

The finest service organization in the world can be rendered impotent if orders received are not explicit. It is therefore most important that the part number (column 3) be quoted in every instance, also the frame and engine numbers of the machine for which the parts are required.

When ordering by telegraph or by cable it will be found convenient and more economical to use the code. Where desirable any two code words can be joined together, but such compounded code words must not exceed ten letters. Code words should be printed in BLOCK letters on telegram forms to avoid error in transmission.

TERMS OF BUSINESS—PAYMENT.

In all cases where we have no ledger account, an invoice will be submitted to intending purchasers, on payment of which goods will be forwarded, or approved references must be given.

CARRIAGE, FREIGHT AND DUTY.

Our Dealers, if asked to do so, will deliver the Spare Parts into the hands of the purchaser free of all transit charges, freight and duty, and will arrange the price accordingly, but where we are not represented, the Spare Parts will be sent from our factory, all charges of carriage, freight and duty being at the charge of the purchaser. Cases of Spares are signed for by the railway and shipping companies as being received in good condition. In case of damage all claims should be submitted to the Insurance Company.

When making remittance by Telegraph Money Order, the name and address of sender must be included in the space provided on the Post Office.

requisition Form for a Private Message from Remitter to Payee; unless this is done the Post Office do not give this information in the telegram. Sufficient cash to cover the approximate cost of postage or carriage must be included in remittance.

SPARES BY C.O.D. SYSTEM.

In countries where the C.O.D. System is in operation, and where it is convenient to order and pay for the goods on delivery, we invite customers to take advantage of these facilities.

RULES TO BE OBSERVED.

1. Parts sent to us for repair, replacement, or as pattern, should bear distinctly sender's full name and address, and explicit instructions should be sent with or under separate cover as to their disposal. In all cases quote number of machine (which is stamped on head lug and seat pillar lug underneath the saddle) or number of engine (stamped on top left side of crank-case), for which the parts are required.
2. All goods must be consigned to us carriage paid.
3. All Motor Cycles received by us if not sent in crate are returned by passenger train, at Company's risk, and Engines by goods train, unless we have other instructions.
4. In cases where Engines require overhauling or frames to have new tubes fitted, the parts should be sent either direct to our Works, Coventry, or London Repair Depot, Bloemfontein Avenue, Uxbridge Road, Shepherd's Bush, W.12.
5. Do not enclose cash (whether in the form of coin or paper) with goods. Remittances should be sent by letter post.
6. All letters and goods referring to Motor Spares or Repairs should be addressed:—

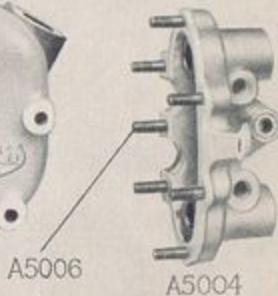

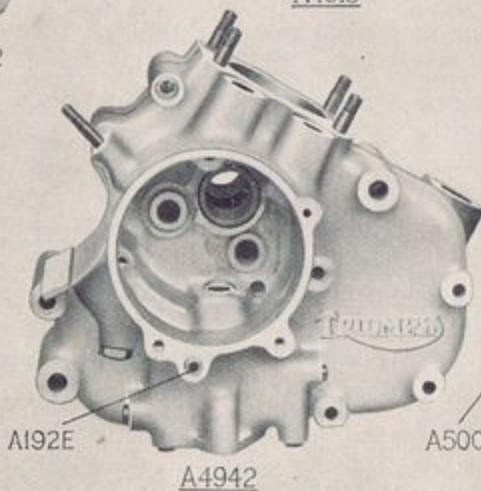

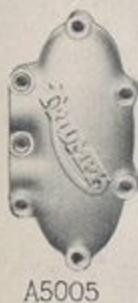

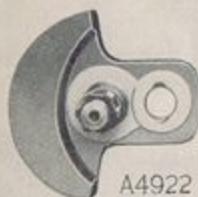

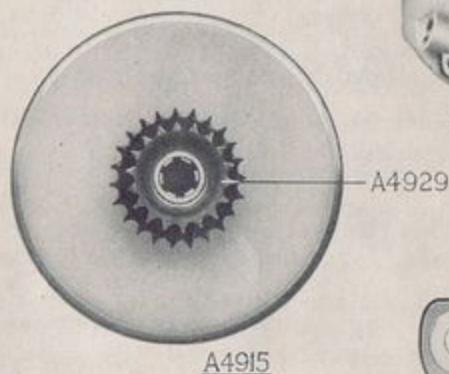

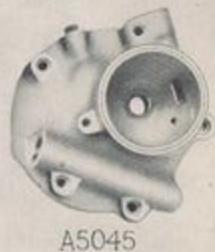

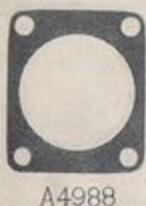

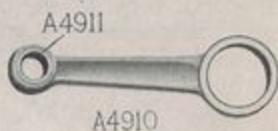

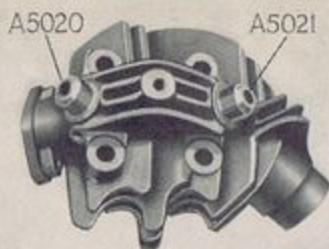

SERVICE AND REPAIR DEPARTMENT.

7. When making enquiries respecting any part or repair, our order number must be quoted, otherwise it is difficult to trace the order.
8. In sending a complete Motor Cycle to us it is essential that all fitments, such as horn, tools, etc., be removed from the machine, otherwise we cannot hold ourselves responsible for their safe return.
9. Customers having no account with us should not fail to remit at the time of ordering, and also include postage.
10. Where a customer has no account a Telegraph Money Order will ensure immediate attention.
11. We recommend Dealers who have an account with us to make use of Triumph Order Books when requiring spare parts. These books we supply on application, free of charge, and renewals can be had at any time.

The prices quoted in this catalogue are subject to alteration without notice. The prices of proprietary fitments printed in italics are fixed by the respective manufacturers.
