DUNELT Supplement Page 2

"The machine with the
Super-charged Engine"

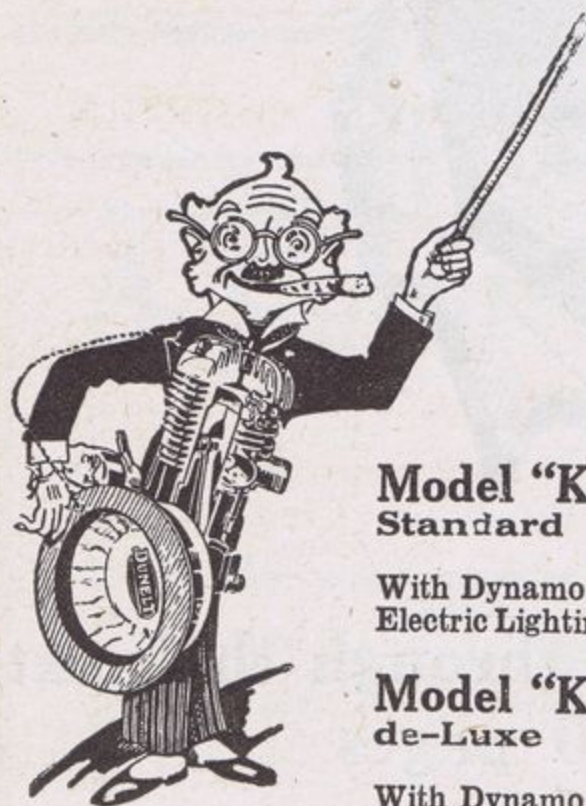

Fitted with Sturmey-
Archer 3-speed Gear
and the Coventry
ULTIMATE Motor
Cycl. Chains.

55 m.p.h.
120 m.p.g.

Here's the wonderful Electrically Equipped

Model "K" Sports-de-Luxe
—the pride of every owner and the
wonder of the motor-cycling world!

Prof.
Supercharge

Model "K" Standard £35-10

With Dynamo Electric Lighting £40- 0

Model "K" de-Luxe £38-10

With Dynamo Electric Lighting £43- 0

NEVER before in the history of motor cycling has a machine created such tremendous interest and enthusiasm, both amongst the Public and Trade—certainly no machine has made such rapid strides in such a comparatively short time.

Here are a few of the reasons—

It embodies a SUPER-CHARGED engine developing 10% to 15% more power without any additional complications—a 6-volt ELECTRIC DYNAMO LIGHTING SYSTEM that turns night into day for the rider—a speed of 55 m.p.h. made safe under all conditions by the remarkable steering properties of the machine, a petrol consumption of 120 m.p.g.—and an all-round specification that places it far ahead of all competitors.

Dunelt-Miller Electric Dynamo
Lighting System includes a 6-volt

Exide BATTERY

of ample capacity, made by the
largest manufacturers in the *Empire*
and backed up by EXIDE service in
every part of the world.

COLMORE CUP TRIAL—Standard "K" de-Luxe WINS THE CALTHORPE CUP

—awarded for BEST PERFORMANCE in 250 c.c. class.

The simplest of all engines beats the best of the more
complicated and expensive types.

DUNELT-MILLER ELECTRIC DYNAMO LIGHTING SYSTEM

includes a 6-volt **Exide** BATTERY of ample capacity made by the largest manufacturers in the **Empire** and backed up by EXIDE service in every part of the world.

DUNELT

"The machine with the
Super-charged Engine"

Fitted with Sturmey-
Archer 3-speed Gear
and the Coventry
ULTIMATE Motor
Cycle Chains.

Here's the "K" Combination

—the most economical form of
motoring for two!

Prof. Supercharge.

Model "K"
Sidecar
Combination

£48-10

With Dynamo
Electric Lighting

£54.2.6

Model "K"
Sports-de-Luxe
Combination

£51-10

With Dynamo
Electric Lighting

£57.2.6

ALTHOUGH low in first cost, running expense and upkeep, this combination will take you and a passenger anywhere where wheels will grip. It is also remarkably fast, while the special DUNELT-MILLER DYNAMO ELECTRIC LIGHTING ensures safe night-driving. The initial cost of the latter is little more than that of a good acetylene lighting set and you more than save the difference during a Season.

Read the convincing testimonial below.

Dunelt-Miller Electric Dynamo
Lighting System includes a 6-volt

Exide BATTERY

of ample capacity made by the
largest manufacturers in the **Empire**
and backed up by EXIDE service in
every part of the world.

Extract from "The Motor Cycle," February 10th:—

"My Solo 249 c.c. DUNELT is capable of speeds between 10 and 58 m.p.h. on top gear. Since August last I have been running the machine with a sidecar and its performance is astounding. Maximum speed is 49 m.p.h., while 44 m.p.h. may be obtained with ease. Top gear performance would do credit to many 500 c.c. outfits."

R. H. N., London, S.W.1.

DUNELT—therefore "STURMEY-ARCHER" is fitted as
standard. The numerous Speed and Reliability Trials won with
Sturmey-Archer Geared machines is proof of unfailing
EFFICIENCY.

Blackest night holds no terrors for the Dunelt rider

At night the rider of the Dunelt "K" can speed at daylight pace, safely and certainly. Like a searchlight the powerful headlamp beam picks out the dangers, warns the unwary, clears the way—two hundred yards ahead! Though the overhanging trees blot out the stars and the tall hedges wall in the deep shadows, that clear flood of golden light takes sunshine along the blackest road and makes night-riding a delight indeed.

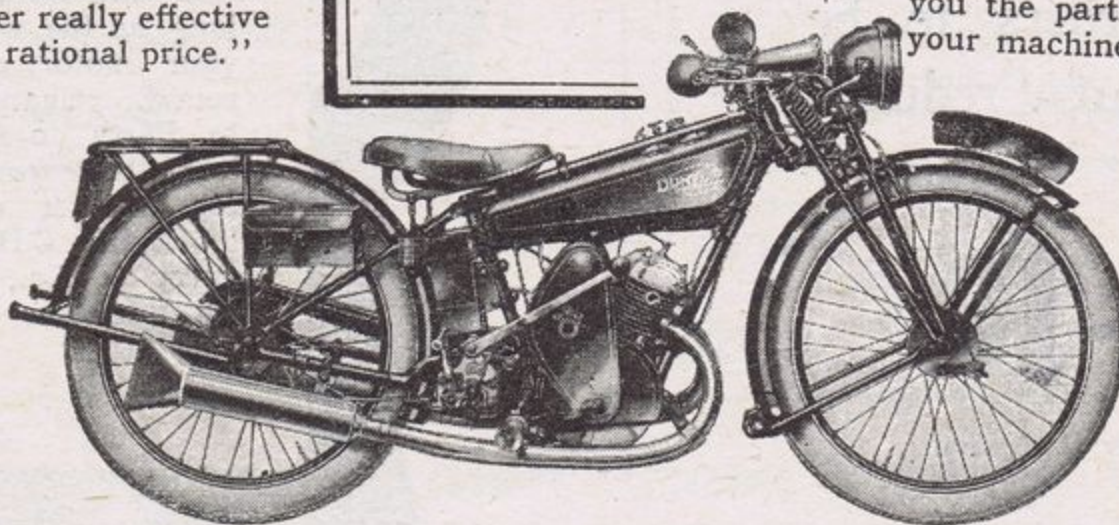

The manufacturers of the Dunelt motor cycle determined to standardise electric lighting on their machine and include it in the price. They chose a Miller set, confident that the resulting increase in orders would pay for the extra cost of the lighting set. "Ixion" said in "The Motor Cycle": "It is probably the first machine in the World to offer really effective lighting at a rational price."

The well-known Dunelt "K" model is fitted with a Miller Electric Lighting Set, comprising: Dynamo $3\frac{1}{2}$ in. diameter, 6 v. 4 amp. capacity at 1,900 r.p.m., Headlamp $6\frac{1}{2}$ in. diameter, Silvered Reflector 6 in. diameter, fitted with 6 v. $9\frac{2}{3}$ w. Double Filament Bulb projecting a minimum beam of 200 yards, Switch: 4-way, off, charge, full dim.

Dunelt decided that nothing but Miller would do for their machine, and that is a lead you can safely follow. Let nothing but Miller be good enough for **your** machine, whatever its make, whatever its age. And if you do not feel ready for electricity, remember, too, that Miller makes the finest acetylene sets as well as the finest electric sets.

Miller lamps have guided the driving travellers of the World's roads for over half a century; and all the wealth of experience gleaned in the past 50 years is built into the popular 1927 models that thousands of motor cyclists are fitting to-day. Dunelt sets a standard by making Miller part of the usual equipment of their motor cycle—but it is a standard you can live up to. See your dealer to-day and ask him to show you the particular lamp for your machine.
